Bharat Taxi: A New Model of Cooperation

The cooperative movement in India is witnessing continuous growth and expansion. To strengthen, empower, and make the cooperative sector more accessible and beneficial to the common people, the Ministry of Cooperation has introduced over a hundred cooperative initiatives. Through technological and structural reforms, these efforts aim to establish the sector as an ideal model to realize the vision of “Prosperity through Cooperation.” The launch of Bharat Taxi is another such significant initiative in the cooperative sector. Unlike private taxi service providers that primarily focus on maximizing profits, Bharat Taxi has been established on the principles of cooperation. This initiative seeks to empower taxi drivers and promote cooperative entrepreneurship, marking a forward-looking and transformative step in India’s taxi service sector. Implemented through a multi-state cooperative society named Sahakar Taxi Cooperative Limited, this initiative has commenced operations in Delhi-NCR, Gujarat, and Maharashtra. With the aspiration of expanding to all major cities across the country over the next three years, Bharat Taxi aims to set a new benchmark in cooperative-driven urban mobility.

This unprecedented initiative, which marks the beginning of a new era in public transport, has given fresh momentum and wings to the cooperative movement. While it is app-based and technology-driven like private companies, this initiative is rooted in cooperative values and is designed to ensure inclusive growth. The cooperative model guarantees equitable distribution of benefits and democratic governance, ensuring that the platform’s gains directly reach those who operate it. Under this taxi service, neither the service provider drivers nor the passengers will suffer any financial disadvantage. The taxi drivers themselves will retain full ownership of the fare received from riders and will not be required to share a portion of their earnings as commission with a service provider company. Similarly, passengers will not be subjected to surge pricing or additional charges during peak traffic hours, as is common with private operators. An interim board has been constituted to oversee the functioning of the cooperative society. However, the active participation of member taxi drivers will remain central to the entire operational framework, reinforcing the democratic and participatory spirit of the cooperative model.

The service was inaugurated by the Union Minister for Home and Cooperation, Shri Amit Shah, who himself had proposed the concept of Sahakar Taxi. The service brings two-wheelers, rickshaws, taxis, and four-wheelers onto a single integrated platform. Most significantly, Shri Shah envisioned a model in which the operational profits of taxi services would directly benefit the drivers. This approach is expected to substantially enhance drivers’ incomes and improve their overall standard of living. Promoted by the National Cooperative Development Corporation (NCDC), Sahakar Taxi has received the support of seven major cooperative institutions of India: Amul, National Agricultural Cooperative Marketing Federation of India (NAFED), National Bank for Agriculture and Rural Development (NABARD), Indian Farmers Fertiliser Cooperative Limited (IFFCO), Krishak Bharati Cooperative Limited (KRIBHCO), National Dairy Development Board (NDDB), and National Cooperative Exports Limited (NCEL).

These institutions have collaborated under the principle of “Cooperation among Cooperatives” to build a sustainable, inclusive, and democratically governed model in the transport sector. Therefore, it is not merely a hope but a strong belief that Sahakar Taxi will bring significant improvements in the working conditions, earnings, and quality of life of taxi drivers, while also providing consumers with affordable, efficient, and reliable transportation services. ◆◆◆

Jai Sahakar

The Budget presented for the country will further empower the poor, the farmers, the youth, and the women. This will not only strengthen our rural areas and increase the income of our farmer brothers and sisters, but will also promote 'Atmanirbhar Bharat' and 'Make in India'.

Shri Narendra Modi
Prime Minister of India

Bharat Taxi is an example of how many people can come together and invest small amounts of capital to achieve great things through cooperatives. With Bharat Taxi, it is not the government but cooperation that is entering the taxi sector. Driver brothers and sisters will not only earn higher profits with Bharat Taxi, but, they will also be respected owners.

Shri Amit Shah
Union Minister for
Home and Cooperation

While the world is slowing down, India is moving forward. Amid the global slowdown, India's economy is projected to grow at a rate of 7.4% in the financial year 2025-26. Strong policies, stable leadership, and a focus on development are the reasons why India is emerging as the world's growth engine.

Shri Krishan Pal Gurjar
Union Minister of State for Cooperation

Under the visionary and experienced guidance of Prime Minister Shri Narendra Modi and the able leadership of Union Minister for Home and Cooperation Shri Amitbhai Shah, unprecedented work is being done in the cooperative sector towards realizing the vision of "Prosperity through Cooperation." Important initiatives are underway, including the expansion of primary cooperative societies, the smooth functioning of multi-state cooperative societies, the empowerment of the dairy sector, the establishment of the world's largest grain storage scheme, and the establishment of two lakh new PACS.

Shri Murlidhar Mohol
Union Minister of State, Ministry of Cooperation, GoI

India is playing a leading role in the global cooperative movement. With more than a quarter of the world's total cooperatives, India's cooperative model is gaining new recognition and trust internationally. This growing global recognition of India is providing new direction to employment generation, women's empowerment, self-reliance, and inclusive development in key sectors such as agriculture, dairy, and banking, from rural to global levels.

Ministry of Cooperation, Government of India

Shri Shah Announces Formal Launch of Cooperative-Based Taxi Service

Bharat Taxi: Steering Drivers Towards Prosperity Route

- ★ 'Bharat Taxi' to be available nationwide within three years
- ★ 'Bharat Taxi' launched not by the government, but by the cooperative movement

Sahakar Jagran Team

Under the leadership of Prime Minister Shri Narendra Modi, the Ministry of Cooperation is developing a model of ownership for people working in the unorganized sector. Within three years, Bharat Taxi will emerge as a major vehicle for the welfare and prosperity of taxi drivers across the country—from Kashmir to Kanyakumari and from Dwarka to Kamakhya.

Union Minister for Home and Cooperation Shri Amit Shah

expressed these views in New Delhi during the formal launch of India's first cooperative-based taxi service, Bharat Taxi. Shri Shah stated that perhaps for the first time in the world, such a unique company is being established whose real owners are neither individuals nor external corporations, but the taxi drivers themselves. Every driver associated with Sahakar Taxi is the true owner of this cooperative taxi society. He described the initiative as a transformative vision that will bring fundamental changes to the lives, confidence, and financial conditions of drivers joining Bharat

Taxi. The service will not only provide affordable and safe travel to passengers but will also open new avenues of self-employment and dignified income for lakhs of drivers across the country.

At this historic event, the participation of more than 1,200 drivers from various states across the country reflected their strong support for the driver-empowerment vision and cooperative ownership model of Bharat Taxi. Shri Amit Shah stated that the service has initially been launched in select cities of Gujarat, as well as in Delhi and the NCR region. He affirmed that in less than three years, it will be expanded to every state and every major city of the country. He further added that many new services will be incorporated into Bharat Taxi in the coming days, and the platform will continue to grow and evolve.

Shri Shah emphasized that the Bharat Taxi model will not only strengthen the economic position of drivers but will also ensure their dignity, security, and ownership. He described the cooperative model being implemented as one of the most innovative and successful initiatives of the present time. Bharat Taxi, he noted, marks the beginning of new dimensions for the cooperative sector. He further stated that although the cooperative movement in India has been active for the past 125 years, the time has now come to take the cooperative model into new and emerging sectors. In the coming years, similar models will be introduced in three or four additional sectors, ensuring that the fruits of hard work and labour remain with the individuals who earn them.

A Safe Travel Option for Women

Bharat Taxi is promoting women's safety and empowerment through initiatives such as "Saarthi Didi" and

A sarathi (driver) welcomes Union Minister for Home and Cooperation Shri Amit Shah, during the launch ceremony of Bharat Taxi.

A Pathway to Prosperity and Well-Being

Motivating taxi drivers, Shri Amit Shah said that while earlier their taxis generated income that went into someone else's pocket, now the wheels of their taxis will turn not for others' profits, but for the prosperity and happiness of taxi drivers themselves. This idea, he emphasized, is born out of the spirit of cooperation. He explained that the true meaning of cooperation lies in the ability of many small capital holders to unite their strength and accomplish great achievements together. In contrast, when large capital is concentrated in a few hands, major enterprises are run by a handful of people and profits remain limited to only a select few.

Shri Shah recalled that when he first mentioned the idea of a cooperative taxi in the Indian Parliament, many people—who could not distinguish between "sarkar" (government) and "sahakar" (cooperation)—questioned why the government was entering the taxi sector. He clarified that it is not the government, but the cooperative movement that is entering the taxi industry. The vision of Bharat Taxi brings together all three categories of vehicles currently operating in the sector—four-wheel taxis, three-wheelers, and two-wheelers—under one unified platform.

Addressing customers and drivers in Delhi-NCR, Shri Shah conveyed that Bharat Taxi is fully operational to serve them. He emphasized that this is not merely a taxi service, but a powerful initiative aimed at enhancing the prosperity, self-respect, and economic strength of millions of drivers across the country.

“Bike Didi.” More than 150 women drivers have already joined the platform. Shri Amit Shah conveyed a message to the women of the country, assuring them that Bharat Taxi will place their safety above all else. Shri Shah explained that a special concept has been designed under the Saarthi Didi initiative. In the near future, the app will feature a separate window dedicated exclusively to Saarthi Didi. Through this feature, any woman registering under this option will be picked up only by a Saarthi Didi.

This facility will provide a major and practical relief for women commuters. In the coming days, through the Saarthi Didi initiative, women across the country will have access to a safe, economical, and dignified mode of travel. It is not merely a service, but a significant step toward ensuring women’s safety, self-reliance, and dignity.

Profit to Be Credited to Bharat Taxi Drivers

Under the Sahakar Taxi model, only 20% of the total profit will be retained by the cooperative for operational sustainability, while the remaining profit will go directly into the accounts of the drivers associated with Bharat Taxi. Even the ₹20 held in the capital account of Bharat Taxi will belong to the drivers themselves. Elections will be held every five years, after which two elected representatives of the taxi drivers will sit on the board. These

representatives will safeguard drivers’ interests and participate in decision-making on their behalf. This, in essence, reflects the true spirit of cooperation and genuine ownership.

The fixed charge determined by Bharat Taxi will remain separate from drivers’ earnings. Importantly, Bharat Taxi will not deduct even one percent commission from the hard-earned income of the drivers, thereby enabling their prosperity to grow rapidly. The objective of Bharat Taxi is not to expand corporate capital, but to increase the income and profit of its real owners—the Saarthi brothers and Saarthi Didis associated with the platform. No driver’s account will be suspended without due hearing. Payments made by customers will be transferred directly and automatically into the driver’s account without any delay.

Shri Amit Shah observed that until now, booking fees, platform fees, and heavy commissions inflated company balance sheets while reducing drivers’ earnings. In Bharat Taxi, there is no such provision for hidden fees or commissions—the drivers themselves are the owners. He noted that this concept may not be easily understood by those influenced by Western corporate thinking, but it represents the true strength of the cooperative model.

Shri Shah further stated that drivers will be completely free

from hidden additional charges, as imposing such charges amounts to unfairness toward them. They will also be relieved from toll, parking, and other extra levies.

Ownership, Security, Dignity & Shared Progress

Bharat Taxi is built upon four core principles—ownership, a protective safety cover, dignity, and fair distribution of profits for shared progress. With these four objectives at its foundation, Bharat Taxi was launched, and it is expected to emerge as a highly successful experiment in the coming years. From its establishment on June 6, 2025 to its commercial launch, within just eight months, more drivers and customers have joined Bharat Taxi in Delhi and Gujarat than any other taxi company. No other company has achieved registrations on such a large scale in such a short span of time.

Access to Insurance, Loans and Subsidies

In the coming days, driver brothers and sisters associated with Bharat Taxi will automatically receive the benefits of insurance, government employment schemes, loans, subsidies, and all government schemes related to gig workers. It was stated that the government is continuously working in this direction to ensure that every driver receives full dignity, security, and financial

strength. At the same time, while reminding drivers of their responsibilities, Amit Shah urged them to maintain good conduct with customers, preserve the goodwill of their taxis, and focus on service quality. He emphasized that a proper grievance redressal system has been put in place, and any action will be taken only after a fair hearing.

Several World-Class Cooperative Models Already Exist in India

India already has several globally successful cooperative models, including Amul, IFFCO, and KRIBHCO. Citing the example of Amul, which has earned global recognition, Shri Shah noted that it began with just 11 milk producers. Today, in Gujarat alone, it has grown into a vast network of more than 3.6 million women livestock farmers. These women collectively generate business worth over ₹1.25 lakh crore, demonstrating how a small beginning by ordinary people can lead to extraordinary outcomes through the cooperative model. Shri Shah further highlighted that some women livestock farmers are earning up to ₹1 crore annually by selling milk—an achievement made possible through cooperation. The initial capital of the cooperative institution was not very large. Similarly, the share capital for member drivers in Sahakar Taxi has been fixed at just ₹500. This modest contribution is what grants drivers the status of true owners. This small amount is set to become the foundation of taxi drivers' hard work, self-respect, and economic independence.

All Drivers Can Easily Register on the e-Shram Portal

The Government of India initiated an important step in 2020–21 for the welfare of gig workers. In the Union Budget 2025–26, the Government has further expanded numerous schemes and benefits for more than 12.5 million gig workers across the country. Earlier, registration on the e-Shram Portal was limited to those whose pensions were deducted or who were formally recognized and registered as workers. This restriction has now been removed, enabling over 12.5 million gig workers nationwide to register on the portal.

Shri Amit Shah stated that all drivers associated with Bharat Taxi can now easily register on the e-Shram Portal.

- Bharat Taxi's "Saarthi Didi" initiative will provide safety to women passengers while ensuring dignity and self-reliance for women drivers.
- Its four core principles are: ownership, a protective safety cover, dignity, and equitable distribution of dividends.
- With the launch of Bharat Taxi, major companies have reduced their commissions and begun offering discounts to drivers and passengers.
- Drivers will receive benefits of up to ₹5 lakh in free medical treatment, along with insurance, affordable loans, subsidies, and access to all government schemes for gig workers.
- Bharat Taxi has signed MoUs with nine major institutions, including Delhi Traffic Police, Delhi Metro Rail Corporation, Airports Authority of India, and State Bank of India.

Once registered, they will automatically become eligible for free medical treatment of up to ₹5 lakh for themselves and their families under the Pradhan Mantri Jan Arogya Yojana. This free healthcare benefit will begin as soon as drivers register and are associated with Bharat Taxi.

Emergency Alert Feature in the Bharat Taxi App

The Bharat Taxi app includes an emergency alert feature designed to provide immediate support during times of crisis. Through this facility, users and drivers can quickly access security and assistance in emergency situations. At present, eight helpline and support centers have already been established in Delhi-NCR, and in the coming period, a comprehensive nationwide network of such centers will be set up across the country. The entire grievance redressal process will operate at three levels—through the app, via the website, and through a toll-free number—ensuring accessibility and transparency. ♦♦♦

Drivers Rejoice as Bharat Taxi Takes Off With Cooperatives Support

First of all, I would like to thank Bharat Taxi. Earlier, I used to run my own business, but I suffered heavy losses. After that, I joined Bharat Taxi, and since then my work has been going very well. The biggest difference between other companies and Bharat Taxi is that here the owners themselves are the Sarathi (driver) brothers. In other companies, there is no such ownership; they operate mainly on a commission-based model. In Bharat Taxi, the entire benefit goes directly into the pockets of the drivers. It is also very beneficial for customers. In the last 45 days, I have completed 85 rides, because of which my name appeared on the award list. For completing more rides, I received a reward of ₹2,500. This will encourage other drivers as well. It is a Swadeshi taxi platform, and the income generated through it remains within the country. More and more driver brothers should participate in it.

Dharmendra Kumar,
Ghaziabad

I am originally from Bihar. After my husband's death, I have been a single mother. I also suffered fractures after falling from the stairs, which made it difficult for me to do many types of work. Despite these challenges, I decided to learn driving and start working as a taxi driver. To support my children, I took a bank loan and bought a cab to begin driving. However, the companies where I used to operate my vehicle suddenly started blocking me without any notice or consideration, which made my situation even more difficult. Then Bharat Taxi came as a major support for me. Now I am able to earn a decent income. It is beneficial for riders as well, and drivers also gain from it. Women drivers are given priority, which is a very positive step. Becoming a cab driver with Bharat Taxi has brought significant benefits to me.

Neelam Sharma,
Delhi

My name is Ghanshyam Gautam and I live in Subhash Nagar. Earlier, I used to run a business, but when it started facing losses, I left it and bought a taxi. After that, I joined some of the taxi companies operating in the market. During this time, I came to know about Bharat Taxi and decided to join it. I also work as a Sahakar Doot (Cooperation Ambassador) with the platform. So far, I have connected around 40-50 drivers to it and I also keep encouraging customers to use its services. Once, my vehicle caught fire. When the officials of Bharat Taxi came to know about the incident, they stood firmly by my side. They assured me that they were with me and would provide every possible help. In contrast, other companies often abandon drivers in situations like accidents and simply remove them from their apps.

Ghanshyam Gautam,
Delhi

My name is Unraj Gadvi. I have come from Ahmedabad, Gujarat. I request all driver brothers across the country to join and adopt Bharat Taxi, because it belongs to us. Until now, other companies operating in this sector have been exploiting drivers. Therefore, we should leave those platforms and connect with Bharat Taxi. The reason is that it is based on a cooperative model, and drivers do not have to pay even a single rupee as commission. I come from Gujarat, which is considered a stronghold of the cooperative movement. The world is familiar with the Amul cooperative from Gujarat, so people there understand the value of cooperation very well. A special feature of Bharat Taxi is that drivers are called Sarathi. This is a matter of pride and respect for us. In the Mahabharata, Krishna himself became the Sarathi of Arjuna, which gives the term great significance and honour.

Unraj Gadvi,
Gujarat

Greetings to all the Sarathi (driver) brothers of Bharat Taxi, and I wish them a bright and prosperous future. Bharat Taxi is a platform run through the cooperative model.

Dharmendra Verma,
Delhi

For all of us driver brothers, it is a golden opportunity. Other companies charge heavy commissions, whereas here nothing is taken in the name of commission. Even if a small amount is collected for platform maintenance, it will be returned at the end of the year along with the profits of Bharat Taxi. We all must work together to make this platform successful. Earlier, even after driving for 15 hours a day on other platforms, we were hardly able to save anything. But here we will receive the full benefit of our earnings. Many additional facilities are also

being provided. I request all our Sarathi brothers to drive through the Bharat Taxi platform and be a part of this cooperative initiative.

I feel very happy after joining Bharat Taxi. In the Bharat Taxi app, special attention has been given to the safety and dignity of women drivers. One unique feature of this initiative is that a telephone number has been provided within the app to resolve any issues. By calling this number, we can directly speak to the concerned person and discuss our problem. This has made it much easier for us to present and resolve our issues, whereas such a facility is not available on many other platforms.

Anupama, Delhi

I feel very happy. By joining Bharat Taxi, the future of both us and our families is becoming more secure. The earnings from this platform come directly to us. It also provides safety and security for the future. With the launch of Bharat Taxi, drivers are receiving basic facilities that support their work. This will allow us to save more money, properly maintain our vehicles, and run our households smoothly. Earlier, joining other companies had become our compulsion. But today, Bharat Taxi has given us a golden opportunity that will strengthen the future of drivers.

Avtar Singh, Delhi

My name is Virendra Singh and I am from Delhi. I have been working in the transport sector since 1990. Today is a very happy moment for us because the Honorable Home and Cooperation Minister Amit Shah is launching the Swadeshi platform Bharat Taxi. Until now, the taxi companies we were associated with required us to work for 8 to 18 hours a day, yet we were still unable to properly support our families. However, we now have great hopes from this indigenous company because we will no longer have to pay commission to anyone. Whatever we earn will be entirely ours. Therefore, all Sarathi (driver) brothers should join this platform. The initiative taken by Amit Shah will benefit not only us but also our future generations.

Virendra Singh, Delhi

Bharat Taxi Signs MoUs for Operational Integration

Sahakar Jagran Team

Union Minister for Home and Cooperation Shri Amit Shah stated that Bharat Taxi has signed partnership agreements (MoUs) with nine leading public and private institutions, including Delhi Traffic Police, Delhi Metro Rail Corporation, Airports Authority of India, IFFCO Tokio General Insurance, and State Bank of India. The objective of these agreements is to strengthen operational integration, digital enablement, and service quality. Through these collaborations, Bharat Taxi customers will receive several additional benefits, while these institutions will also gain seamless access to Bharat Taxi's services. These organizations have

- ✦ Bharat Taxi will strengthen employment, mobility, tourism, and the local economy.
- ✦ In Delhi-NCR alone, 250,000 drivers and more than 850,000 passengers have joined this taxi service.
- ✦ A unique ownership-based cooperative model has been developed for people working in the unorganized sector, enabling them to become stakeholders rather than just service providers

now become stakeholders in the success of the cooperative taxi initiative.

Delhi has become the first state in the country to join the Bharat Taxi cooperative cab model. The MoU between Delhi Tourism and Transportation Development Corporation and

Sahakar Taxi Cooperative Limited aims to strengthen safe, reliable, and transparent taxi services in Delhi. Taxi drivers will receive special training in soft skills as well as Delhi's culture, history, and heritage, enabling them to serve as brand ambassadors for Delhi tourism. Under the cooperative

model, drivers will retain a larger share of their earnings, leading to increased income.

As part of this initiative, Bharat Taxi will be permitted to digitally operate 34 pre-paid taxi booths across 21 locations in Delhi. This will enhance passenger safety, transparency, driver income, and overall service quality. In collaboration with the Delhi Traffic Police, Bharat Taxi has also established a Joint Command and Control Center featuring real-time ride monitoring, SOS alerts, and a rapid emergency response mechanism. This system will promote road safety, regulatory compliance, and passenger security.

Under the Memorandum of Understanding signed with the National e-Governance Division (NeGD), Bharat Taxi will receive advisory and technical support under the Digital India framework. This will enable integration with DigiLocker, UMANG, and API Setu. As a result, drivers will benefit from paperless onboarding, unified access to government services, secure interoperable operations, cashless payments, and improved operational efficiency.

Under its partnership with

the Delhi Metro Rail Corporation (DMRC), last-mile connectivity will be provided at 10 major metro stations through bike taxis, e-autos, CNG autos, and cabs. Passengers will be able to plan and pay for their entire journey on a single platform, while drivers will benefit from more trips and reduced idle time.

The MoU signed with the Airports Authority of India (AAI) will regulate Bharat Taxi's operations at AAI airports across the country. This includes designated pick-up zones, signage permissions, and strict safety and service standards, ensuring regulated airport operations nationwide.

Under agreements with the Delhi Tourism and Transportation Development Corporation and Delhi Airport Parking Services, Bharat Taxi's white cab services have been permitted at multiple parking locations across terminals of Indira Gandhi International Airport. Delhi Airport Parking Services will provide a 20 percent discount on the ₹245 per-trip pick-up fee for the first year. This is expected to significantly increase the number of airport rides and overall revenue for Bharat Taxi.

IFFCO Tokio General Insurance

has been onboarded as the insurance partner of Bharat Taxi, providing drivers with personal accident insurance coverage of ₹5 lakh at nominal rates. In addition, it will offer long-term advisory support on driver welfare and insurance solutions.

The MoU with Paytm will enable Bharat Taxi to strengthen its digital payments ecosystem, co-branded offerings, and fintech capabilities. This includes payment gateway integration and access to Paytm's partner ecosystem. Paytm is also supporting the driver community with health insurance solutions, including family coverage.

The partnership with GMR Group will further enhance airport mobility operations, strengthening Bharat Taxi's regulated access and service expansion at terminals of Indira Gandhi International Airport.

Through the MoU with State Bank of India, financial assistance for commercial passenger vehicles will be facilitated under schemes such as the Pradhan Mantri Mudra Yojana. Sahakar Taxi will identify and support eligible driver-owners, while SBI will ensure prompt consideration in accordance with its prevailing guidelines. ♦♦♦

Bharat Taxi Keeps Other Operators on the Edge

Sahakar Jagran Team

The launch of Bharat Taxi—a much-discussed initiative in the cooperative sector—has given sleepless nights to other taxi operators. The various facilities being provided to Sarathis (drivers) associated with the Bharat Taxi platform have created a sense of concern among competing companies. While drivers on Bharat Taxi receive the full fare without any commission deduction, other taxi companies charge heavy commissions, which reduces drivers' earnings. In order to compete with Bharat Taxi, other companies

have now started offering various incentives to both drivers and passengers. Some companies are reducing fares to attract riders, while others are announcing coupons and rewards for drivers. Under the growing pressure of Bharat Taxi, existing taxi platforms are also introducing attractive incentives for their drivers

(Sarathis). Since the launch of Bharat Taxi, more than 375,000 drivers have already registered on the platform, which itself is a record. At the same time, around 22 lakh customers have downloaded the Bharat Taxi app and completed registration, and these numbers are increasing every day. ♦♦♦

Shri Shah Speaks at the top-level meeting of Narco Coordination Centre

Aiming for a 'Drug-free India'

Sahakar Jagran Team

Primetime Minister Shri Narendra Modi has set the goal of making India the foremost nation in the world in every field by the time the country celebrates the centenary of its independence. To build such an India, it is our collective responsibility to ensure complete protection of the younger generation from drugs. Safeguarding the country's future generations will be carried out with the highest priority.

Union Home and Cooperation Minister Shri Amit Shah expressed these views during the ninth apex-level meeting of the Narcotics Coordination Centre (NCORD) held at Vigyan Bhavan in New Delhi. He stated that under the leadership

of Shri Modi, India has achieved considerable success in the fight against drugs over the past 11 years. A campaign against drugs, lasting three years, is about to begin and the aim is to create a "Drug-Free India" and protect the nation's youth from drugs.

While reviewing the collective national efforts being made to tackle the threat of narcotics in the country, Shri Shah emphasized the government's comprehensive approach to dismantling drug networks and cartels, addressing the challenges associated with clandestine networks, strengthening extensive investigations, and preventing the misuse of precursor substances. He said that the government has now gained momentum and will move forward with a three-point plan of action. He

stated, "Only by adopting a collective ruthless approach toward the drug supply chain, a strategic approach toward demand reduction, and a humane approach toward harm reduction can we achieve the goal of a drug-free India." The government's clear position is that there should be no leniency toward those who manufacture and sell drugs, but a humane approach should be adopted toward individuals who have begun consuming them.

Expressing satisfaction with the government's achievements in the fight against narcotics, Shri Shah said that while the previous government seized 26 lakh kilograms of drugs worth ₹40,000 crore between 2004 and 2013, the present government has seized 1.11 lakh kilograms of drugs worth ₹1.71 lakh crore over the past 11 years. ♦♦♦

Adi Shankaracharya's Granthavali published in Gujarati

Adi Shankaracharya Upheld Principles of Sanatan Dharma, Says Shri Amit Shah

Sahakar Jagran Team

Knowledge never has an end, because it continues to progress

endlessly. Among all the knowledge that exists in this universe, nothing surpasses "Shivodruham." No one has explained the Upanishads in such a simple, precise, and truthful manner as Adi Shankaracharya did.

Union Home and Cooperation Minister Shri Amit Shah expressed these views during the release of the Gujarati-language publication of the collected works of Adi Shankaracharya in Ahmedabad. Expressing happiness over the publication of the ocean of knowledge composed by Adi Shankaracharya in Gujarati by the Sastu Sahitya Mudranalaya Trust, Shri Shah said that the availability of Adi Shankaracharya's collected works in the local language is a great treasure for the youth of Gujarat. The publication of Adi Shankaracharya's ocean of knowledge and these 24 books will certainly have a profound impact on the lives of young people.

Shri Shah said that Adi Shankaracharya established such a tradition that the service of Sanatan Dharma would continue for ages to come. He urged the youth to read at least once the text Vivekachudamani written by Adi Shankaracharya. With the Gujarati translation and interpretative version of this text now available, it will be much easier for young people to access it. Shri Shah said that Adi Shankaracharya

not only gave ideas but also provided integration to India. He not only imparted knowledge but also gave it structure. He did not merely speak about moksha but also showed the path to attain it. At such a young age, Adi Shankaracharya traveled across the country on foot several times, effectively playing the role of a walking university in those times and presenting the identity of India. He established four monasteries in the four directions of the country and, by raising the flag of Sanatan Dharma in the east, west, north, and south, he established centers of knowledge where a permanent system was created for the preservation and propagation of all the Vedas and Upanishads.

Shri Shah said that Adi Shankaracharya established akharas in the most difficult circumstances to ensure that Sanatan Dharma would never decline, and he built an organized structure for the preservation of Sanatan culture. The integrated philosophy that liberation (moksha) can be attained through the three paths, bhakti, karma, and gyan, is a great contribution of Adi Shankaracharya. By reviving the tradition of shastrartha (scholarly

debate), he laid the foundation for resolving issues through dialogue and for a culture of reasoned discussion and debate. From the worship of nature to recognizing the fundamental essence of Sanatan Dharma, he opened a path that made these ideas accessible.

Shri Shah said that Swami Akhandanand made a significant contribution to the collective character building of Gujarat. He presented the teachings of the Shrimad Bhagavad Gita, the Mahabharata, the Ramayana, Yoga Vasistha, the discourses of Swami Ramtirth, Ramkathamrit, and numerous texts on ethics to the youth in a very simple manner. Through literature that highlighted Ayurveda, Sanatan Dharma, and noble ideals, Swami Akhandanand conveyed the essence of Sanatan Dharma in Gujarati by sharing the sayings and instructive stories of many sages and seers. To provide the youth of Gujarat with excellent literary works at affordable prices, he established a major institution known as the Sastu Sahitya Mudranalaya Trust, which has made many important texts, including Kautilya's Arthashastra, available in the Gujarati language. ♦♦♦

PM Shri Narendra Modi Addresses the Annual NCC PM Rally

Expanding Global Job Opportunities for India's Youth

- ✦ India's Free Trade Agreements (FTAs) with several countries are creating countless opportunities for millions of young people
- ✦ Skilled and outstanding Indian youth professionals are in high demand worldwide
- ✦ As citizens, we must place our duties at the highest priority to build Viksit Bharat

Sahakar Jagran Team

This is the greatest era of opportunities for India's youth. The government is committed to ensuring that young people derive maximum benefit from this period. Prime Minister Shri Narendra Modi said this while addressing the Annual NCC PM Rally. Referring to India's Free Trade Agreements with the European Union, Oman, New Zealand, United Kingdom, United Arab Emirates, Australia, and Mauritius, Shri Modi stated that these agreements are generating innumerable opportunities for millions of young Indians.

The entire world places immense trust in India's youth. This trust stems from their skills and values. Indian youth carry with them the principles of democracy, respect for diversity, and the belief that the world is one family. As a result, wherever they go, they integrate easily with local communities and contribute meaningfully to the development of those nations. These values are deeply rooted in India's culture and character.

Describing India's youth as hardworking and outstanding professionals, Prime Minister Shri Narendra Modi said that it is precisely this excellence that has created immense global demand for them. Millions of Indians are

working in the Gulf countries. Indian doctors and engineers are helping build world-class healthcare systems and infrastructure across several nations. Indian teachers working abroad have contributed new values and enriched societies worldwide. Alongside their global contributions, the achievements of Indian youth within the country are also earning international recognition. It is because of these young talents that India has become the backbone of global information technology. Their dynamism is driving revolutions in startups, space, digital technology, and virtually every sector of the economy.

Referring to the Free Trade Agreement with the European

Union as the “Mother of All Deals,” Shri Modi described it as a transformative development in the global landscape. He noted that this agreement covers nearly one-fourth of the world’s GDP and one-third of global trade, and is, in essence, “freedom to fulfill aspirations” for India’s youth. The agreement with the 27-nation European bloc will support Indian startups by facilitating easier access to financing and innovation ecosystems. It will also strengthen India’s creative economy in sectors such as film, gaming, fashion, digital content, music, and design. Furthermore, it will generate new opportunities for Indian youth in research, education, IT, and professional services. Because of its far-reaching benefits, the agreement is being termed the “Mother of All Deals.” It is expected to accelerate the momentum of the Atmanirbhar Bharat Abhiyan and reinforce the vision of Make in India with the spirit of “Make for the World.”

Under this agreement, more than 99 % of India’s exports will either attract zero tariffs or significantly reduced duties. This will benefit industries such as textiles, leather, gems and jewellery, footwear, engineering goods, and micro, small and medium enterprises. Weavers, artisans, and small entrepreneurs will gain direct access to the vast markets of 27 European countries, opening unprecedented avenues for growth and expansion.

Referring to the agreement’s potential to attract greater investment into India and facilitate the establishment of new plants in engineering, electronics, chemicals, pharmaceuticals, and other manufacturing sectors, Prime Minister Shri Narendra Modi said that it would also create robust markets for agriculture, food processing, and fisheries. This, he emphasized, would open significant opportunities

for farmers, fishermen, and rural youth. The Free Trade Agreement with the European Union directly connects India’s youth to Europe’s employment market. It is expected to generate substantial opportunities, particularly in engineering, green technology, design, logistics, and advanced manufacturing. For Indian youth, new pathways are opening across 27 European nations.

Highlighting the reaffirmation of India’s strength and the valor of its Armed Forces during Operation Sindoor, along with the progress made in indigenous weapons development, Shri Modi observed that the role of youth skills in modern warfare has undergone a profound transformation. Wars today, he said, are not fought solely with tanks and artillery, but increasingly through code and cloud. Nations that lag in technology are vulnerable not only economically but also in terms of security. Innovations driven by young minds strengthen patriotism and contribute directly to national security. With rapid growth in defence startups, the development of Made-in-India drones, and the modernization of the Armed Forces through AI and defence innovations, new opportunities are emerging for technology-driven and innovative youth within the defence sector.

Referring to the Swachh Bharat Abhiyan, Shri Modi said that a developed India is not defined solely by economic prosperity; it

also depends on the conduct of its citizens, who must place their duties above all else. Although the campaign was initiated by the government, it was carried forward and transformed into a mass movement. It demonstrated that cleanliness is not merely a task, but a habit, a lifestyle, and a value. He emphasized that the spirit of civic responsibility must become an integral part of daily life. Just as individuals aspire to keep their homes and courtyards beautiful, they should extend the same commitment toward keeping their cities clean and well-maintained. He urged the youth to dedicate at least one hour every week for cleanliness.

Describing good health as the greatest test of youth power, the Prime Minister said that fitness should not be confined to a few minutes of exercise; rather, it must become an inherent part of one’s character. It requires a disciplined lifestyle encompassing healthy eating habits and a structured daily routine. Referring to the rising incidence of obesity among young people, Shri Modi noted that studies indicate that one in every three Indians may face obesity in the future. Obesity increases the risk of serious ailments, with the youth being particularly vulnerable. He urged young people to remain vigilant about their health and to reduce excessive oil consumption as part of a healthier lifestyle. ♦♦♦

Shri Shah releases centenary issue of 'Kalyan' magazine in Rishikesh

Gita Press: Nurturing Devotion Towards Indian Ethos & Culture

Sahakar Jagran Team

Among the many significant efforts made to immortalize India's culture, one of the most enduring and powerful initiatives is the magazine Kalyan. It is not merely a publication, but a spiritual guide for generations of Indians. Over the past 100 years, it has united the virtuous strength of followers of Sanatan Dharma. Union Minister for Home and Cooperation, Shri Amit Shah, expressed these views in Rishikesh during the release of the centenary issue of the monthly magazine Kalyan, published by Gita Press. He described the completion of one hundred years of a magazine like Kalyan as a remarkable achievement. From its inception to the present day, every word, sentence, and issue of Kalyan has been dedicated to Sanatan Dharma and Indian culture. It has consistently sought to carry the

✦ Kalyan has kept the lamp of Indian culture burning through every crisis and has worked to organize the virtuous strength of followers of Sanatan Dharma

eternal flame of knowledge to every reader, and through its efforts, a visible celebration of Sanatan consciousness is being witnessed across the country.

Shri Amit Shah said that the contribution of Gita Press is unparalleled. He noted that Kalyan has kept the lamp of Indian culture burning through every crisis. He emphasized that Gita Press does not function for profit, but for nation-building and the shaping of generations. Operating in a self-reliant manner, Gita Press has undertaken the monumental task of bringing the commentaries on the Upanishads by Adi Shankaracharya, along with a vast corpus of sacred literature, to millions of people. Shri Shah further stated that Kalyan has taught us that civilizations are built

not by the sword, but by words and knowledge. Words, however, become truly powerful only when they shine with the light of truth and purity.

Gita Press Aims at Character and Nation Building

Shri Amit Shah stated that the objective of Gita Press is character building and nation building. He noted that the institution has highlighted the tireless efforts of millions of saints and made their teachings accessible to the public through extensive publications. By producing a wide range of spiritual and cultural literature, Gita Press has helped awaken a deep national consciousness. He said that in the most challenging periods of history, countless saints safeguarded and

nurtured Dharma, virtue, and culture. Publications such as Kalyan, brought out by Gita Press, have consistently preserved the eternal flame of Sanatan Dharma. As a result, we are once again witnessing a renewed attraction toward Sanatan Dharma, a resurgence of hope, and a deepening faith in Indian culture.

Shri Shah remarked that anyone in India—or anywhere in the world—who loves this land cannot remain unaware of Gita Press. So far, Kalyan has published 100 special issues dedicated to Sanatan thought and values. He pointed out that the 1932 issue of Kalyan presented Shri Krishna from multiple perspectives—as an object of devotion, a statesman, a philosopher, and a great figure who subdued evil forces. In 1936, the “Yoga Issue” elaborated in detail on the philosophy, form, and systems of Yoga. He further noted that after Independence, Kalyan was the first to publish a “Women’s Issue.” Its “Hindu Culture” issue was released in 1950, at a time when national policies were being shaped under strong Western influence. The thought behind that issue, he observed, must have been that as an independent nation formulates its own policies, they should be rooted in Indian cultural values rather than foreign ideas.

Gita Press Strengthened the Flame of Sanatan Dharma

Revered Hanuman Prasad Poddar strengthened the flame

Cultural Values in National Policy

Shri Amit Shah said that over the past 11 years, under the leadership of Prime Minister Shri Narendra Modi, cultural values have been systematically integrated into the country’s policymaking. During this period, a significant qualitative transformation has taken place among the youth. There is no longer opposition to education in the mother tongue. Whenever Prime Minister Modi speaks in Hindi on global platforms, the entire nation feels a deep sense of pride. Shri Shah stated that after 550 years, a grand temple of Ram Lalla has been constructed in Ayodhya. The Kashi Vishwanath Corridor, rebuilt after the original structure was demolished during the rule of Aurangzeb, sends a message to the world that the power of faith is far greater than the power of destruction. He further said that the Government of India has decided to celebrate the cultural symbol Somnath Temple throughout the year as “Somnath Swabhiman Year.” He noted that Somnath was destroyed 16 times nearly a thousand years ago by invaders such as Mahmud of Ghazni and Alauddin Khalji, yet it was rebuilt each time. Those who destroyed it have faded into obscurity, but the eternal flag of Somnath continues to fly high. Shri Shah also mentioned that Article 370 has been removed from Kashmir, the Mahakaleshwar Jyotirlinga corridor has been developed, Kedarnath Temple has been redeveloped, and the expansion of Badrinath Temple (Badridham) has been completed.

of Sanatan Dharma for nearly 103 years through Gita Press. He dedicated his entire life to Gita Press and inspired millions of people toward spirituality through unwavering devotion and faith in Indian culture. The sole objective of his efforts was the welfare of individuals and the well-being of the world.

Shri Amit Shah said that the spirit of universal welfare is deeply embedded in Kalyan. He further remarked that during British rule, it had become almost fashionable to dismiss religion as

superstition. At that time, without using any aggressive language, Bhajji lit a lamp of knowledge in the form of Kalyan. Through logic, scriptures, and calm reasoning, he responded to the criticism directed at our foundational beliefs—because Sanatan Dharma can be protected not through noise, but through scriptural wisdom and rational argument. Shri Shah also emphasized that Gita Press never engaged in self-promotion or fundraising campaigns, as its mission was not centered around individuals, but on ideas. ♦♦♦

Immense Opportunities in India's Energy Sector, Says PM Shri Narendra Modi

Sahakar Jagran Team

India is the world's fastest-growing major economy. The demand for energy products in the country is steadily rising. India also offers excellent opportunities to meet global demand. The country ranks among the top five exporters of petroleum products in the world, with exports reaching more than 150 countries. Today, India stands as a land of immense opportunities in the energy sector. These remarks were made by Prime Minister Shri Narendra Modi at the inauguration ceremony of India Energy Week 2026.

Referring to an agreement between India and the European Union—which is being described globally as a “landmark agreement”—Prime Minister Shri Modi said that it has opened vast opportunities for India's 140 crore citizens as well as millions of people in European countries. He described the agreement as a remarkable example of coordination between two of the world's largest economies, accounting for nearly 25 % of global GDP and approximately one-third of global trade. Beyond trade, the agreement also strengthens the shared commitment to democracy and the rule of law.

Highlighting India's proactive role in fostering global partnerships across sectors, Prime Minister Shri Narendra Modi said that in the energy sector alone, there are vast investment opportunities across the entire energy value chain. India has significantly opened up its exploration sector. Referring to the

✦ India is now moving beyond energy security toward an energy independence mission

deep-sea exploration initiative under the Samudra Manthan Mission, he stated that by the end of this decade, India aims to increase investment in the oil and gas sector to \$100 billion. The objective is to expand the exploration area to one million square kilometers. In this direction, more than 170 blocks have already been allocated, and the Andaman and Nicobar Basin is emerging as the next major source of hydrocarbons.

Discussing reforms in the exploration sector, the Prime Minister noted that suggestions received during previous editions of India Energy Week have been incorporated into legislative and regulatory changes. Highlighting another key strength, he said that India possesses vast refining capacity and currently ranks second in the world in this field. Soon, India is set to become the world's number one country in refining capacity. At present, India's refining capacity stands at approximately 260 million metric tonnes per annum, with efforts underway to increase it to

over 300 million metric tonnes per annum.

Referring to the steadily growing demand for LNG and the target of meeting 15 % of the country's total energy demand through LNG, the Prime Minister emphasized the need for collaboration across the entire LNG value chain. He stated that India is making large-scale efforts in the transportation sector and is building the necessary vessels for LNG transport. Along with the construction of LNG terminals at Indian ports, numerous investment opportunities are also emerging in regasification projects.

Urban gas distribution networks have already reached many Indian cities and are expanding rapidly to others. India is now moving beyond energy security toward an energy independence mission. The country is developing an energy ecosystem capable of meeting domestic demand while making exports highly competitive globally through affordable refining and transportation solutions. ◆◆◆

Prime Minister Narendra Modi Speaks on Parakram Diwas

India Modernizing the Armed Forces Through Self-Reliance

- ✦ The inspiration of Parakram Diwas will continue to strengthen India's firm resolve
- ✦ India knows how to acquire power, manage it, and use it effectively

Sahakar Jagran Team

A weak nation cannot achieve its goals; that is why Subhas Chandra Bose always envisioned a strong India. In the 21st century, India too is establishing itself as a powerful and resolute nation. Referring to Operation Sindoor, Prime Minister Shri Narendra Modi said that India retaliated decisively by entering the homes of those who harmed the country and eliminating them. Today, India understands how to acquire power, how to manage it, and how to use it effectively.

Following Netaji Subhas Chandra Bose's vision of a strong India, the country is working to make the defense sector self-reliant. Earlier, India depended solely on importing weapons from abroad, but today India's defense exports have surpassed ₹23,000

crore. Indigenously developed BrahMos and other missiles are drawing global attention. India is modernizing its armed forces through the power of self-reliance. The Prime Minister made these remarks while addressing the Parakram Diwas program in the Andaman and Nicobar Islands via video conferencing. Referring to the collective resolve of 1.4 billion citizens to work toward a Developed India, he said that this path has been strengthened by the Aatmanirbhar Bharat Abhiyan and inspired by the mantra of Swadeshi. The inspiration of Parakram Diwas will continue to energize India's journey toward becoming a developed nation.

Prime Minister Shri Narendra Modi said that January 23 is the proud birth anniversary of Subhas Chandra Bose. Netaji's bravery and courage continue to inspire the nation and fill every

heart with deep respect for him. Parakram Diwas has now become an important national occasion reflecting the spirit of the country. Referring to the decision to hold the main Parakram Diwas ceremony of 2026 in the Andaman and Nicobar Islands, the Prime Minister said that the history of these islands is filled with tales of valor, sacrifice, and courage. The stories of patriots like Vinayak Damodar Savarkar in the Cellular Jail, along with the islands' association with Netaji Subhas Chandra Bose, make this celebration even more special.

Shri Modi said that the land of Andaman stands as a symbol of the belief that the idea of freedom can never be extinguished. Many revolutionaries were subjected to torture here, and numerous freedom fighters sacrificed their lives, yet instead of fading, the flame of independence grew even stronger. ◆◆◆

Shri Amit Shah Attends 10th 'Mising Youth Festival' in Dhemaji, Assam

Tribal Rights are Protected not by Guns, but by Cultural Unity

Sahakar Jagran Team

ur government is dedicated to the welfare of tribal communities.

Under the leadership of Prime Minister Shri Narendra Modi, we have left no stone unturned in the development of Assam. We believe that all cultures, languages, and traditions in India have an equal right to thrive, and it is through the promotion of all these that we can progress,' said Union Home and Cooperation Minister Shri Amit Shah while addressing the 10th Mising Youth Festival in Dhemaji, Assam. Shri Shah said that the Mising community is the heartbeat of the Brahmaputra Valley. Mising culture is the soul and living identity of Assam and India, as well as a symbol of the India of the future.

He emphasized that protecting

- ✦ The Mising community has made the supreme sacrifice to protect the country, which India will never forget
- ✦ Today, Assam's youth are embracing vision over weapons and dreams over fear
- ✦ By the end of 2026, the 'Made in Assam' chip will enhance India's pride across the world

one's rights, culture, language, literature, dance, and music cannot be achieved with weapons in hand but through platforms like the Youth Festival. This approach is driving Assam forward, where the government has recognized the Mising language in education across 200 lower primary schools. Shri Shah also highlighted that the Assam government has freed 1,26,000 acres of land from encroachers.

Shri Shah said that while the

previous central government had allocated ₹1,28,000 crore to Assam over a period of 10 years, under Shri Modi's leadership, the government has allocated ₹4,50,000 crore for Assam's development. For infrastructure alone, the government has provided ₹30,000 crore for road construction, ₹95,000 crore for railways, and ₹10,000 crore for airports.

Shri Shah also noted that under the leadership of Atal Bihari

Vajpayee, the government had established the Tribal Commission and the Ministry of Tribal Affairs. The Modi government declared 15th November as Adivasi Gaurav Diwas and has built tribal museums across the country with a Budget of ₹200 crore. He further mentioned that until 2014, the total Budget for the Ministry of Tribal Affairs and the ST component was only ₹28,000 crore, whereas in the previous Budget under the Modi government, ₹1,35,000 crore was allocated for tribal development. The government has also increased the Budget for Eklavya Residential Schools by 25 times.

10,000 Youth Return to the Mainstream

Shri Shah said that under the leadership of Prime Minister Shri Modi, Assam is progressing on the path of peace. The government has signed several agreements and taken weapons away from nearly 10,000 youths. As a result, the youth of Assam are now embracing a vision of progress instead of weapons and dreams of development instead of fear. The government has provided over 1.56 lakh government jobs here without any recommendation. With the semiconductor factory being established, more than 27,000 youths will get employment, and by the end of 2026, chips produced in Assam will reach markets across the world. Shri Shah added that in the coming days, there will be special recruitment of Mising youths in the Central Armed Forces, enabling local youth to actively contribute to India's internal security.

Mising community to make Assam infiltrators-free

Shri Shah said that the Mising community has the responsibility to make all of Assam free from illegal immigrants. He stated that in seven of our districts, which have

Invaluable Contribution of the Mising Community in Freedom Struggle

Shri Shah said that we can never forget the contribution of the Mising community in India's freedom struggle, as in every conflict, the Mising community made the highest sacrifices for the security of the nation. This community has also worked to reduce floods by allowing rivers to flow freely. He noted that in the past, different tribes struggled to protect their cultures, while the governments of that time sought to suppress them. However, our government has appointed representatives who are working toward resolving all such issues. Shri Shah said that the creation of the Bogibeel Bridge was the result of the sweat and hard work of our Mising brothers and sisters. Today, this bridge stands as a symbol of the vision of a new India, which the Modi government completed in just four years. He also mentioned that Ali-Aye-Ligang is an excellent example of balancing human activity with nature. Shri Shah added that the Doni-Polo religion, which reveres nature, ancestors, truth, and morality above all, not only preserves the identity of Assam and Arunachal Pradesh but also makes India renowned worldwide.

now become heavily populated by immigrants, the population of illegal immigrants had reached millions during the 20 years of rule by previous governments. This has completely altered the state's demographics, and reversing this change is the responsibility of our government. Shri Shah said that the central and state governments are working together to prevent further

infiltration and to carefully identify and remove illegal immigrants. He added that last year, on the occasion of Independence Day, Prime Minister Shri Modi had announced the High-Power Demography Changing Mission. This mission will study the unnatural demographic changes occurring across the country and suggest measures to address them. ♦♦♦

PM launches rail and road projects in Malda, West Bengal

Building Modern and Self-reliant Indian Railways Govt's Top Priority

Sahakar Jagran Team

Indian Railways is not only becoming modern but also self-reliant.

India's locomotives, coaches, and metro coaches are emerging as symbols of the country's technology. Prime Minister Shri Narendra Modi said this while inaugurating and laying the foundation of several rail and road infrastructure projects worth ₹3,250 crore in Malda, West Bengal. Referring to India's production of more locomotives than the United States and Europe and the export of passenger train and metro train coaches to several countries, Shri Modi said that this benefits the country's economy and creates employment opportunities for the youth. Connecting India is a priority, and reducing distances is a mission.

The Prime Minister said that the campaign to accelerate West Bengal's development from Malda has gained further momentum.

- ✦ Vande Bharat sleeper trains are launched in India
- ✦ Modern trains will be expanded across the country in the near future

New rail services have been started for the state, making travel easier for people and boosting trade. The newly established rail maintenance facilities will also provide new opportunities for the youth of Bengal.

Speaking about another major step towards the modernization of Indian Railways from Bengal's sacred land, Shri Modi announced the introduction of Vande Bharat Sleeper trains in India. These new Vande Bharat Sleeper trains will make long-distance journeys more comfortable and luxurious for citizens. The design and features of trains in a developed India are clearly reflected in the Vande Bharat Sleeper trains. Previously, people admired foreign trains in pictures and wished to have such trains in India; today, this dream is becoming a reality. Foreign

tourists are recording videos of the revolutionary changes happening in Indian Railways. The Vande Bharat train is "Made in India," built with the hard work and dedication of Indians. The country's first Vande Bharat Sleeper train will connect the land of Maa Kali with the land of Maa Kamakhya. In the coming years, this modern train will be expanded across the country.

Referring to the electrification of Indian Railways and the modernization of stations, Shri Modi highlighted that more than 150 Vande Bharat trains are operational across India, including West Bengal. Alongside, a complete network of modern and high-speed trains is being developed. This transformation is providing substantial benefits to poor and middle-class families. ◆◆◆

Shri Modi Inaugurates projects worth crores in Singur, West Bengal

Developing Eastern India is a Priority for Viksit Bharat, Says Prime Minister

Sahakar Jagran Team

The country's first Vande Bharat Sleeper Train has been launched from West Bengal. The state has also received nearly half a dozen new Amrit Bharat Express trains, and three more Amrit Bharat Express services have been started. For a developed India, the development of eastern India is essential. Expressing this view, Prime Minister Shri Narendra Modi inaugurated and laid the foundation stone for development projects worth more than ₹830 crore and flagged off trains in Singur, Hooghly district, West Bengal. Speaking about the immense potential of waterways in Bengal and the ongoing work in this direction, Shri Modi said that assistance is being provided for building the necessary infrastructure for port-based development. Recently, projects related to ports and river waterways have also been inaugurated and had their foundation stones laid. These projects are extremely important for the development of West Bengal and India. They are the pillars on which West Bengal can be developed as a major hub of manufacturing, trade, and logistics.

Referring to the generation of large-scale employment through a focus on ports and the ecosystems connected to them, the Prime Minister said that over the past 11 years the central government has made significant investments in

✦ The expanded port gateway system being built in Balagarh will open new opportunities for Hooghly and surrounding areas

expanding the capacity of Syama Prasad Mookerjee Port. Under the Sagarmala Scheme, roads have also been constructed to improve the connectivity of this port. The results of these efforts are now becoming visible. Last year, the Kolkata Port achieved new records in cargo handling. The extended port gate system being developed in Balagarh will open new opportunities for Hooghly and surrounding areas. It will reduce traffic and logistics pressure in Kolkata city. Cargo movement will further increase through this waterway built on the Ganga River. This entire infrastructure will help transform Hooghly into a storage and trade center. It will bring in new investments worth hundreds

of crores, create thousands of jobs, benefit small traders and transporters, and open new markets for farmers and producers.

Shri Modi said that India is now placing special emphasis on multi-modal connectivity and green transportation. To ensure smooth transport, ports, waterways, highways, and airports are being interconnected. This is reducing both logistics costs and transportation time. Efforts are also being made to make transport systems environmentally friendly. Hybrid electric boats will strengthen river transport and green mobility. This will make travel on the Hooghly River easier, reduce pollution, and promote river-based tourism. ♦♦♦

Shri Amit Shah Attends Convocation Ceremony of CHARUSAT in Gujarat

Building a Tradition of Sustainable Development in the Last 11 Years

Sahakar Jagran Team

Under the leadership of Prime Minister Shri Narendra Modi, over the past 11 years, a tradition of sustainable development has been established through the initiation of numerous development initiatives. As a result, India's prestige has increased across the world and vast opportunities have opened up for the youth. Union Home and Cooperation Minister Shri Amit Shah expressed these views during the 15th convocation ceremony of Charotar University of Science and Technology (CHARUSAT) in Anand district, Gujarat.

Shri Shah said that during the Azadi Ka Amrit Mahotsav, the Prime Minister placed a resolve before the nation that when India completes 100 years of Independence on 15 August 2047, the country should stand first in the world in every field. This resolve has now become

- ✦ Efforts, hard work and planning are being made to make the country number one in the world in every field by 2047
- ✦ On August 15, 2047, when we complete 100 years of Independence, India will be number one in the world in every field

the collective commitment of 1.4 billion Indians and efforts through determination, hard work, and planning are being made in this direction.

Shri Shah further said that in the 75 years of independence, India has achieved a great deal and made progress in many sectors. However, the period from 75 to 100 years of independence is both an Amrit Kaal (a golden era) and a period of national resolve for the country. He noted that India has already achieved many milestones. Eleven years ago, in 2014, India's economy was ranked 11th in the world, but today it has become the

fourth-largest economy globally. This means immense opportunities for the country's youth in terms of development. He asserted with confidence that by December 31, 2027, India will become the third-largest economy in the world. In this way, a platform has been created in the country from which India's youth can compete with young people across the globe.

India Becomes a Global Manufacturing Hub

Shri Shah stated that India is now a global manufacturing hub, capable of shaping the course of the global economy for the next 25 years. The world cannot ignore India in the

fields of green energy and aerospace. We have a strong start in green hydrogen. We have made rapid progress in defense production. He noted that the world is astonished by India's progress in semiconductor manufacturing. Furthermore, 60% of the world's pharmaceuticals are manufactured in our country.

Fundamental changes in higher education

Shri Shah stated that visionary planning has led to fundamental changes in the field of higher education in the country over the past eleven years. This has led to fundamental improvements in the number of seats in educational institutions, course design, and post-graduate opportunities. He stated that the number of higher education institutions has increased from 51,000 between independence and 20,000 to 71,000 in recent years. During this period, the number of colleges in the country has increased from 38,498 to 53,000, and universities have also increased from 760 to 1,391. Shri Shah stated that the number of medical colleges has increased from 387 to 818, while the number of MBBS seats has increased from 51,000 to 129,000, and the number of PG seats has increased from 31,000 to 82,000. Such efforts have created immense development opportunities for the youth of the country. Shri Shah stated that startup culture is inherent in the youth of India. We are the third largest startup in the world and third largest unicorn startup.

Youth should contribute to reconstruction of society

Calling upon the students of Charotar University to contribute to the reconstruction of society through their knowledge and good character, Shri Shah said that Sardar Vallabhbhai Patel's statement, "Education without

Idea of Cooperation is Need of the Hour

Shri Shah said that the land of Charotar has given a great deal to India. Gems born on this land, such as Sardar Vallabhbhai Patel, Viththalbhai Patel, and Hirubhai M. Patel, have contributed to the nation in various fields. The fundamental idea behind Amul, whose success has amazed the entire world, also originated from this very land of Charotar. Today, Amul is the world's number one cooperative organization in the cooperative sector, with a turnover of ₹1 lakh crore, and more than two million women from Gujarat are associated with it. Referring to the recent establishment of Tribhuvan Sahkari University in Anand, he said that Tribhuvandas Ji had also founded Amul and introduced a model of cooperation in the country that was successfully implemented. This idea of cooperation, he emphasized, remains a vital need for the nation even today.

character building is useless," is the fundamental principle of all our lives. Education is not limited to degrees or skill enhancement. Education is responsible for inculcating discipline and character in youth and students, and for acknowledging their responsibility towards society. He said that education alone cannot bring welfare to humanity, society, or the country. Only when knowledge and character are combined can one be useful to both humanity and society. Knowledge brings competence, and a life without purpose never reaches its goal.

Shri Shah provided six life lessons to the youth, teaching them direction in life. These include inspiration, encouragement, self-development, and a broad sense of national development for the young generation:

- Always dream big in life, overcome the fear of failure, and have the courage to strive hard.

Your dreams will surely come true.

- Youth with technical education should constantly reflect on how technology can be used for society and the country.
- Keep learning continuously and never let the student within you die.
- There is no other way than learning.
- Resolve to never take shortcuts in acquiring technological knowledge, and
- Nothing is above the country. Do your work with the vision of making the country great in 2047.

Shri Shah said that in life, only those people have achieved something who set a clear goal and dedicated their entire lives to fulfilling it. He stated that every student graduating from CHARUSAT, whether as a graduate, doctorate, or double graduate, should have the objective of dedicating their life to building a great India by the year 2047. ♦♦♦

'Pariksha Pe Charcha' with Prime Minister Shri Narendra Modi

Big Ideas Often Grow from Small Beginnings, Says Prime Minister

Sahakar Jagran Team

Education is necessary not only for personal development but also for social life and should never

be underestimated. Sports should be made an integral part of daily life, and students should practice breathing exercises at least once a day. Prime Minister Shri Narendra Modi said these things during the interactive program Pariksha Pe Charcha. Speaking about environmental responsibility, Shri Modi said that protecting natural resources should become a habit. Change comes gradually when more and more people come together. Responding to a question on leadership, the Prime Minister said that future leaders should be able to communicate their ideas clearly and effectively. Learning does not involve only reading but also writing and practice.

- ✦ Instead of succumbing to the pressure of comparison, strive to learn and improve
- ✦ Befriend those who struggle with their studies and help them learn

Urging students not to be influenced only by success and to learn from the humble beginnings of great personalities, the Prime Minister said that one should never become complacent in life and should always strive to move forward. Shri Modi advised parents not to create a competitive atmosphere at home and asked students to avoid unfair comparisons and instead focus on self-improvement.

Referring to ways to deal with stress and anxiety during examinations, Shri Modi advised students to look beyond exams and focus on life skills, sports, creativity, and self-development. Encouraging students to begin their

entrepreneurial journey with small startups, he said that big ideas often grow from small beginnings. He advised students to build connections with professionals from the industry, understand how real-world systems work, and gain practical experience beyond textbooks.

On maintaining a balance between studies and interests, the Prime Minister said that students should not consider academic and creative activities as separate or opposing paths. Both are equally important and can be balanced effectively. Artistic and creative hobbies can help students relieve stress and fatigue caused by academic pressure. Emphasizing

the importance of responsibility, Shri Modi said that disciplined daily behavior plays an important role in nation-building.

Referring to initiatives such as Vocal for Local, the Prime Minister said that choosing Indian products strengthens the domestic economy. Mentioning the Wed in India campaign, which encourages people to hold weddings within the country rather than abroad, Shri Modi said that every small step taken by citizens contributes to achieving the goal of a developed India by 2047. He emphasized that both discipline and motivation are necessary. Without discipline, motivation alone is often ineffective. Discipline provides direction, while motivation strengthens the journey.

Advising students not to fear artificial intelligence and technology, Shri Modi said they should use it wisely rather than become dependent on it. Technology is a powerful teacher and should be adopted with awareness and responsibility so that it can be used as a tool for learning, innovation, and development. The Prime Minister also advised students to travel not merely as tourists but as learners.

Encouraging them to explore new places with curiosity and a desire to understand culture, history and lifestyle, Shri Modi said that a good student develops a strong grasp of subjects, makes continuous efforts, participates in healthy competition, and befriends classmates who may be struggling academically to help them learn.

Responding to a student's query related to startups, Shri Modi advised students to first focus on their interests and goals, whether it involves technological innovation, developing drones, or practical solutions such as electrical systems. Forming small teams with friends skilled in technology and finance can be helpful. He said that age is not a barrier to starting an enterprise and even small startups can be impactful. He suggested visiting existing startups, preparing a project report, and presenting it honestly as a school project, which can encourage guidance and support. Through this process, students gradually gain important knowledge about moving forward step by step, which will be helpful in future endeavors. Addressing another student's concern about balancing studies and hobbies, Shri Modi said both are useful and

complementary to each other. Giving an example of combining art and science experiments, he said creativity can help learning and reduce fatigue. While giving priority to education, it is also necessary to set aside daily or weekly time for personal interests.

Speaking about career choices, the Prime Minister said that constantly changing aspirations can create confusion. We should draw inspiration from successful people and not only look at their achievements but also understand the effort and discipline behind them. True success creates its own identity. A successful student becomes recognized by the entire school, village, and community. On the issue of fear and self-confidence, Shri Modi said that people who trust themselves never fear and carefully study situations before taking action. Referring to the famous Swami Vivekananda's Chicago Speech (1893), he said that Swami Vivekananda was initially nervous, but he prayed to Maa Saraswati for strength, and when he began his speech with the words "Sisters and Brothers of America," the audience applauded for several minutes, which became a significant turning point. ♦♦♦

Govt Lays Emphasis on Social Inclusion in Economic Progress, Says Shri Gurjar

- ★ The Union Budget 2026-27 offers opportunities for youth, a strong platform for women, stability for farmers and assurance of expansion for entrepreneurs

Sahakar Jagran Team

nder the leadership of Prime Minister Shri Narendra Modi, the government is placing special emphasis on social inclusion in the country's economic progress. The Union Budget for the financial year 2026-27 has also taken concrete steps in this direction, providing opportunities for youth, a strong platform for women, stability for farmers, and expansion prospects for entrepreneurs.

Union Minister of State for Cooperation Shri Krishan Pal Gurjar expressed these views through social media and stated that this Budget is a step toward India's self-reliance. Describing it as inspired by the vision of "Prosperous Farmers, Empowered India," Shri Gurjar said that the interests of farmers have been fully taken into account. This Budget, which presents a new roadmap for agriculture, will not only increase farmers' incomes but also connect farming with modern technology and sustainable resources. Emphasis has been

placed on the use of modern technology from crop production to marketing. Farmers will be provided with seeds, fertilizers, pesticides, and modern agricultural equipment at reasonable prices. With the development of 500 reservoirs and Amrit Sarovars, fisheries within the country will also receive a boost. Coconut cultivation will be promoted to increase the income and productivity of coconut farmers.

The Budget also provides for the expansion of industrial capacity and creates new opportunities for the creative industry. Skill labs will be established across the country for this purpose, with a target of generating 2 million jobs in this sector by 2030. The Budget also proposes the establishment of three dedicated chemical parks, along with a new scheme for construction and infrastructure equipment. An allocation of ₹10,000 crore has been made to promote container manufacturing in the country. In addition, the Budget announces the revival of 200 industrial clusters and the development of seven high-speed corridors to provide new connectivity across the nation.

To strengthen micro and small

enterprises, a fund of ₹10,000 crore has been created. Additionally, to reduce dependence on other countries and decrease imports, an extra capital of ₹2,000 crore has been added to the Atmanirbhar Bharat Fund. To promote industries in Tier-II and Tier-III cities, the support of "Corporate Mitra" will be utilized. To encourage rural women's entrepreneurship, markets for their products will be provided through SHE Marts. Women entrepreneurs working in villages will also receive financial assistance for innovation and for the industrial units they lead.

Referring to the Budget's commitment to the vision of a developed India and its mention of making the country a biopharma hub, Shri Gurjar said that Ayurveda is a strength of a self-reliant India. The announcement in the Budget of three new All India Institutes of Ayurveda and a ₹10,000 crore fund will contribute to making India a global leader in this sector. Medicines for cancer, diabetes, and for boosting immunity will now become more affordable, and dependence on imports for these medicines will also decrease. ♦♦♦

Agricultural Service Cooperative Society Boosts Fortunes of Himachal Farmers

Sahakar Jagran Team

Inspired by Prime Minister Shri Narendra Modi and under the leadership of Union Home and Cooperation Minister Shri Amit Shah, the idea of “Sahkar se Samridhi” is steadily taking shape on the ground. Guided by this vision, cooperative societies are empowering their members as well as others in their communities. The Badgaon Agricultural Service Cooperative Society, located in Bilaspur district of Himachal Pradesh, has been a strong partner in the progress of farmers for the past 62 years. Keeping pace with changing times, the society has guided farmers toward self-reliance through modern technology and improved resources. The economic stability brought about by the society’s efforts, the easy availability of daily necessities, and opportunities to connect with new markets have transformed the village and changed the destiny of its farmers.

This society, which has 1,952 members, is engaged in empowering them through a variety of services.

The society provides deposit facilities, which members use to save their money with it. The society pays interest on these deposits and utilizes the funds for productive activities. It also offers loan facilities to its members. Farmers regularly take loans from the society for their needs and repay them on time. In addition, the society provides the facility of the Kisan Credit Card.

The cooperative society also provides insurance services to its member farmers. Members avail themselves of both life and general insurance. These services are provided at very low premiums. Complete transparency is maintained in delivering these services, which strengthens the trust of farmers and encourages them to participate actively. Through a Common Service Centre, the society offers various services to its members. Members no longer need to run from place to place for services such as PAN cards, Aadhaar cards, or driving licences. Through the society, they can now apply for these services online. Essential documents and other paperwork are made available to them without difficulty. The society also operates an outlet

under the Public Distribution System, through which farmers can easily obtain subsidized ration nearby. There are now no complaints of irregularities in this service. In addition, the society runs an electronics store, where members and other local residents can purchase electronic goods at reasonable prices.

Farmers no longer have to go from place to place in search of high-quality seeds, saplings, fertilizers, pesticides, herbicides, spray pumps, or agricultural equipment. The society provides all these resources. Farmers benefit from this facility, as it ensures access to quality inputs at reasonable prices. With these resources, they are able to maximize their crop production. This leads to their economic empowerment and helps meet the needs of their families. In the last financial year, the society earned a profit of ₹9,72,253. It distributed a dividend of ₹1,05,472 to its members. Expanding its scope of activities, the society has also launched the Badgaon Farmer Producer Organization. In the future, the society aims to further increase farmers’ incomes and create new markets for local products. ♦♦♦

Dr. K. K. Tripathi

Union Budget Lays Focus on Development of Cooperatives

The Budget for the financial year 2026-27, presented in Parliament, has made an effort to strengthen cooperative societies. This Budget is a step toward realizing Prime Minister Shri Narendra Modi's vision of a Viksit Bharat by 2047. To achieve this ambitious goal, it outlines a practical pathway. The development-oriented Budget places strong emphasis on infrastructure development and reforms. Its objective is to make states and Union Territories active partners in the country's development journey. It also envisages promoting entrepreneurship, value addition, and the collective management of resources. The Budget includes provisions to professionalize the functioning of cooperative societies, expand markets, and increase farmers' incomes.

Primary Agricultural Credit Societies (PACS) had long been awaiting tax relief, and the Budget has finally addressed their demand. Cooperative societies that supply oilseeds, fruits, and vegetables produced by their member farmers have now been brought under the ambit of tax deductions. This will strengthen their position in the market. The measure also promotes better coordination with federal cooperative societies. It enables primary units to expand, integrate, and remain competitive in the marketplace. Tax relief will increase the income of cooperative societies and encourage greater investment in infrastructure, technology, and quality inputs. The government's

move also incentivizes primary cooperative societies to supply essential agricultural inputs to federal cooperatives. As a result, member farmers will gain access to necessary farming resources at affordable prices. Reduced costs will make farming easier while also improving the quality of agricultural produce. This will enhance the competitiveness of cooperative societies. Under the new tax regime, if dividends are distributed to the members of cooperative societies, tax deductions will be permitted on inter-cooperative society dividend income. This eliminates the problem of double taxation within the cooperative chain and ensures that tax is imposed only at the member level.

The Budget also promotes investment and income generation in the cooperative sector. It ensures that the benefits generated from such initiatives are returned to cooperative societies themselves. This measure is expected to encourage greater investment in the cooperative sector. As a result, cooperative societies will become more professional and competitive. At the same time, their dependence on government grants or subsidies is likely to decline.

The Budget attempts to increase rural incomes by boosting agricultural production and related business activities. Cooperatives can enhance farmers' incomes by aggregating agricultural produce from farmers and delivering it to markets. This will particularly benefit small and marginal farmers. Through professional management,

cooperative societies can evolve into platforms for sustainable income generation for their member farmers. The Budget also emphasizes promoting animal husbandry. Provisions have been made for the development of reservoirs, fisheries, and livestock. Cooperative societies can play a crucial role in these areas. By utilizing these resources effectively, cooperatives can accelerate the pace of development. Along with increasing production, they can also enhance the value of products through processing and branding, thereby raising farmers' incomes.

The Budget has empowered handloom cooperative societies through the Mahatma Gandhi Swaraj initiative. This will benefit the weavers working in this sector. Economically and technologically empowered cooperatives can increase the market reach of handloom products while enhancing the income of their members through skill development and modernization.

The Budget has allocated ₹364 crore for the computerization of primary cooperative societies. This allocation could prove to be a game changer for rural cooperative institutions. It will bring greater transparency, speed up operations, and ensure accountability within these societies. The need of the hour is to translate the ₹357 crore allocated for cooperative training and education into concrete outcomes. Professionalizing cooperative societies must be given the highest priority. ♦♦♦

Joint Secretary, Prime Minister's Economic Advisory Council

The National Cooperative Union of India (NCUI) successfully organized a youth training program in New Delhi, imparting practical knowledge of cooperatives to 53 youth, including topics such as cooperative society registration and drafting bylaws. NCUI Deputy Chief Executive Smt Savitri Singh interacted with the participants.

NCUI organized a day-long awareness program on cooperatives at Bhagini Nivedita College, Delhi University, where NCUI Deputy Chief Executive Smt Savitri Singh, Executive Director Shri Ritesh Dey and Shri Rajiv Sharma informed the students about the role of youth in cooperative development and the cooperative business model.

The National Centre for Cooperative Education (NCCE) of the NCUI organized an educational tour to KRIBHCO, New Delhi, for representatives of Primary Agricultural Credit Societies (PACS) from West Bengal. The tour was conducted as part of a training program focused on leadership development, cooperative education and capacity building. During the visit, participants gained practical exposure to soil and seed testing, soil health testing and innovation.

The National Cooperative Union of India (NCUI) organized capacity-building programs for cooperatives in Mizoram, which saw strong participation from presidents, board members and enthusiastic youth from cooperative societies in Siaha, Lawngtlai, and Lunglei districts, strengthening the spirit of cooperation at the grassroots level.

NCUI, in collaboration with the Cooperative Department of the Mizoram Government, organized a capacity-building program for cooperatives and stakeholders across the state, which was enthusiastically attended by over 90 representatives from various cooperative societies in Aizawl, Kolasib and Mamit districts.

The National Center for Cooperative Education organized a five-day training program on forming cooperative societies for youth and university students, with 53 participants from 11 states. NCUI Deputy Chief Executive Smt Savitri Singh highlighted the important role of cooperatives in socio-economic development.

We have provided loans of more than ₹30 lakh crore to the youth of the country through the Mudra Yojana without any guarantee, and they have used them to expand their businesses. It is a matter of pride that a large number of mothers and sisters have also become eligible for this and are beneficiaries of it. Nowadays, rural women are dreaming big and want to stand on their own feet. We not only expanded women's self-help groups, but also arranged direct financial assistance for 10 crore sisters.

**Shri Narendra Modi
Prime Minister**

NCUI हाट

NCUI Haat is pioneering a collaboration between NCUI and lesser-known cooperative institutions, offering a unified platform for product sales and exhibitions. Through its innovative online portal, NCUI Haat is fostering an environment to realize the vision of 'Sahakar se Samridhi'.

CEAS-LMS Portal

Cooperative Extension & Advisory Services-Learning Management System, i.e., (CEAS-LMS), is first-of-its-kind online platform which provides Information and Services required by Cooperative Members, Leaders, Managers and General Public. It is being run under 3 components:

1. **LMS:** Learning Management System (**LMS**) focuses on educating its registered members on all elements of Cooperative Education.
2. **QMS:** Query Management System (**QMS**) is a platform where users can express their concerns pertaining to Cooperatives, in order to receive a quick and high quality advices.
3. **CRC:** Cooperative Resource Centre (**CRC**), is a platform for stakeholders to collaborate and exchange Cooperative related information and knowledge.
